Rod,  
Good talking with you this morning. Here are copies of the informational flyers which Carol Bergin prepared in support of the upcoming community outreach efforts Ecology is conducting, in conjunction with the PLPs. Please let us know if you have any questions. Carol and her team will be performing community interviews with various residents and local contacts from businesses and schools in the area. The interviews will provide a better understanding of community perceptions about, and awareness of, the ongoing cleanup work at the Pasco Landfill site.

We will let you know when we plan to be down at the site to observe the Zone B cover system construction work. Hopefully you can join us for a brief site tour – schedule permitting. The construction work likely will get started in mid- to late-May, and probably will last for a couple of weeks.

Thanks again for the information related to the FOIA request from Keane's law office.

Chuck
